

# James Sohl

Reno, Nv

- A. My major is business management with no minor. I plan to go into Real Estate. I have yet to make a decision on commercial or residential but I do plan on starting with residential to get my toes wet and then move forward. The thing that is making me hesitant about residential is that it's all emotional and the exact opposite goes for commercial. It's all numbers. I'm excited to see what I choose in my future. If it does come to it where I don't like I plan on going into some sort of sales.
- B. My background with computers is a good amount but that does not make me good. I have used multiple software like google doc, photoshop, and ChatGPT
  - a. I have used google doc for all of my school work.
  - b. My reason to use photoshop is mainly so for my fraternity, making designs for instagram, banners, and decoration.
  - c. I use ChatGPT for a bunch of different reasons. From helping me with refinding my writing and studying to helping make food recipes and counting macros
- C. Some things that I will list about myself are my sports I played, music I enjoy, and my goals and motivation to be successful.
  - a. I used to play Football and my position was inside linebacker. I also played lacrosse and played mid field and fo go mid. If I was asked to pick which one I liked most it would be hard for me to choose. They are two completely different sports. Football is a huge team sport where if one guy isn't doing their job correctly and the rest of the team falls down. Football is also super slow paced compared to Lacrosse.
  - b. I enjoy multiple types of genres, from multiple types of rock, reggae, country, and rap. I believe that those who do not listen to multiple types of genres are not

only missing out but also missing out on having music express how they feel and help them understand their emotions.

- c. My motivation to be successful in my career is to be able to give my children and wife the same opportunities that I was given from my parents. I will give them at least what I have been giving but shooting to give them more.
